Art Unit: 1623

Claims 1-27 and 59-81 are withdrawn from further consideration as being drawn to a non-elected invention, the election having been traversed in paper filed November 26, 2003

Applicant's election with traverse of Group III, claims 28-58 and 82-88, drawn to a composition comprising Formula I filed November 26, 2003 has been noted. However, upon further consideration it has been noted that the compound of Formula I contains patentably distinct species drawn to saccharide derivatives and to non saccharide derivatives having separate classifications and requiring separate searches. Therefore, a further election of species is set herein below.

This application contains claims directed to the following patentably distinct species of the claimed invention: 1) The compounds of claims 29-31, 44-48, 50-56 directed to saccharide derivatives classified in class 536, subclass 17.2 and 2) claims 57-58, drawn to steroid derivatives classified in class 552, subclass 502..

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 28, 32-43, 49 and 82-88 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1623

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elli Peselev whose telephone number is (571) 272-0659. The examiner can normally be reached on 9.00-5.30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Wilson can be reached on (571) 272-0661. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
